U.S.SAWS™

U.S.SAWS Cut Vac Assembly

The U.S.SAWS Cut Vac - Crack Chaser is designed to route out random cracks in concrete before filling them with a repair material or sealant. This machine is used by concrete repair contractors as well as industrial floor coating contractors. The dust shroud completely covers the blade, so dust collection is superior when attached to the appropriate vacuum. This saw is perfect for indoor work where dust collection is critical. The Cut-Vac is constructed with an all-metal blade guard with a polycarbonate dust shroud that will hold up to abrasive concrete dust. It is powered by a Metabo 24-180 8,500 rpm grinder.

Features

- Versatile hand-held dust-free saw for: routing random cracks, decorative concrete cutting, and joint clean out
- Attaches easily to dust collectors (sold separately) for a cleaner work site
- 1-1/8" maximum cutting depth with 8" blade
- Adjustable depth shoe
- Uses dry diamond blades
- Assembly includes Metabo W24-180 grinder and shroud

Model	Cut Vac
Part Number	SX70000
Description	Hand-Held Crack Chaser
Grinder/Motor Make/Model	Metabo W24-180
Power Source	15 Amp 110V Electric
Max RPM	8,500
Max Cutting Depth	1-1/8"
Blade Diameter	7" or 8"
Blade Width	.250"
Blade Arbor	7/8"
Weight	27 lb
