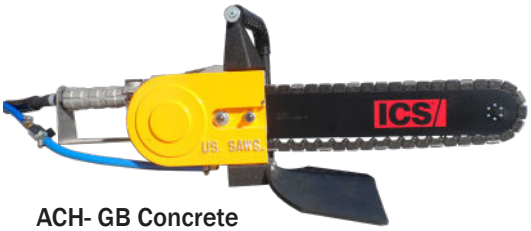
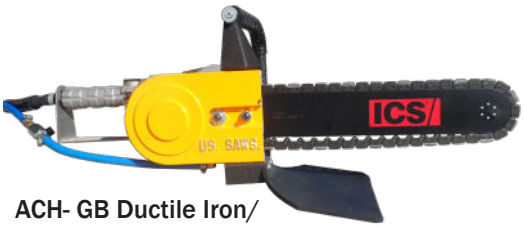
# U.S.SAWS™

## U.S.SAWS 16” & 20” Air Powered Chain Saw



ACH- GB Concrete



ACH- GB Ductile Iron/
PowerGrit

U.S.SAWS ACH-GB series chains saws are designed for demanding jobs that require cutting of ductile iron and other types of pipe. You can also pair it with our standard concrete chain to create a concrete cutting saw. This type of concrete cutting is ideal for applications requiring square corners without overlapping cuts. It has the capabilities of a plunge cut up to 16” deep.
It can be powered with commonly used power sources. The ACH-GB line of chain saws has the power you need to get the job done quickly and safely.

Packages Available in 16” or 20” with the PowerGrit or Concrete Chain

*Features:*

- PowerGrit chain is used for Ductile Iron, HDPE, PVC, Cast and other similar types of pipe
- The concrete chain is used for concrete pipe, reinforced concrete pipe, and concrete structures
- Cuts square corners without overlapping cuts
- Cut irregular shapes
- Safe to operate - no “kickback”
- Wet cut with no hazardous dust
