U.S.SAWS™

U.S.SAWS Pro Grinder Assemblies

HAND-HELD GRINDERS WITH DUST SHROUDS

The U.S.SAWS Pro Grinders are a hand held concrete surface grinder that is designed to prepare concrete surfaces for coatings and collect the dust at the same time while hooked up to a vacuum. This grinder is considered a “must have” for any industrial flooring contractor that applies floor coatings or needs to remove old coatings, carpet glue or grind down high spots. The Grinder is designed to grind edges, tight areas, underneath fixtures or other areas where a larger floor grinder or shotblaster will not reach.

Features:

- Hand-held units that are great for smaller jobs or in combination with walk-behind grinders on larger projects
- Use on concrete for cleaning, leveling high spots or uneven floor surfaces, removing glues, mastic, epoxies and other coatings
- May be connected to a variety of dust collection systems for dust containment
- The unit’s polyurethane dust shroud is long lasting and is offered in full shrouds and convertible models that flip up to allow for edge work along walls
- Systems include an electric grinder, dust shroud (full or convertible) and hardware for mounting diamond cup wheels, ZEC wheels, or polishing pads

Size	5”			7”
