

U.S.SAWS™

U.S.SAWS One Man Polymer Pump

The U.S.SAWS new and innovative design of the polymer pump allows one person to control the pump's position with one hand while dispensing the joint filler with the other. Left and right-handed operations are comfortable with the double-sided "T" handle. This "One Man Pump" allows other workers to handle different tasks while one person is filling joints.

Area

Easy Filling

Waste Bucket Holder

Features:

- The new design of this joint fill pump allows for one-person operation
- The unit comes standard with a 1:1 component ratio, but a 2:1 component ratio is available
- Lower tanks make filling easier
- Dedicated storage area for generator or battery
- Waste bucket holder for fewer drips on the floor
- Enclosed box for tools storage

Model	Polyethylene Tanks
Part Number	SX20550
Power Source	1/2 HP Electric Motor
Power Requirements	110V, 60 Hz
Other Power Options	Gas Generator or Deep Cycle Marine Battery with Power Inverter
Frame	Steel
Tanks	6.5 Gallon Polyethylene
Manifold	Re-Buildable, One-Piece, Aluminum Dispensing Manifold
Compatible Materials	Polyurea and Epoxy Joint Fillers
