

U.S.SAWS™

5" HAND- HELD CRACK CHASER

The 5" Crack chaser is a hand-held crack chasing saw designed to rout out random cracks before filling. This saw is also used for cutting repair patches in concrete surfaces where a dust-free environment is needed. It can also be used for joint clean-out and joint fill removal in areas where the larger joint clean-out saws will not fit. The full metal blade guard protects the operator, and the polycarbonate dust shroud is durable enough to hold up to abrasive concrete dust.

The premium 5" crack chaser is powered by a 5" Metabo WE15-125 grinder and the standard model is equipped with Metabo W9-115 grinder.

Features:

- Light-weight system for horizontal or vertical surface crack repair applications and cutting out mortar or grout joints
- When used with a vacuum system, controls dust for cleaner work area
- Cut up to 1-1/4" deep with a 5" blade
- Uses dry diamond blades
- This saw can use a 4", 4.5", or 5" blade
- Assembly includes a grinder, shroud, and adapter ring
