

U.S.SAWS™

CORE DRILL WITH STAND

The traditional core drill is a highly effective tool known for its speed, precision, and efficiency when it comes to drilling holes in concrete and other tough materials. With the capability to core holes up to 16 inches in diameter, this drill is versatile enough to handle a variety of projects. Whether you're working with concrete, brick, stone, or similar materials, the core drill is designed to deliver consistent, clean cuts, making it an indispensable tool for the professional contractor. Its reliability and ability to maintain accuracy, even on challenging surfaces, highlight its importance in construction and renovation work.

Features:

- Lightweight and portable
- Mechanical clutch protection
- Constant power, step-less speed regulation
- Safety clutch and overload protection
- Drill holes up to 16" with the traditional unit

MODEL	TRADITIONAL CORE DRILL
Capacity	4" to 16"
Electrical Requirements	115V
Cord Length	12'
RPM	260/ 390/ 530
Package Size	29"x9"x16"
Weight	75 lbs
Part Number	US28612
