

U.S.SAWS™

5 GALLON BATTERY OPERATED TANK

The 5-gallon battery-operated pump delivers a flow rate of up to 1 gallon per minute and offers a battery life of up to 8 hours on a full charge, providing reliable performance throughout the workday. Designed with oversized 6" wheels and a convenient lifting handle, this unit is easy to transport across various job site terrains. The collapsible handle also allows for compact storage and greater portability when not in use.

Includes: 5-Gallon Battery Operated Water Feed Tank, Battery Charger, Collapsible Handle, and (2) 6" Durable Wheels

Features:

- The sprayer is equipped with a durable 5-gallon polyethylene tank, designed to withstand tough job site conditions while providing ample capacity for extended use
- Powered by a 12-volt, 1-gallon-per-minute pump, the system ensures a consistent and efficient flow rate for a wide range of applications
- The battery is designed for convenience, with a full recharge time of just two hours, allowing for minimal downtime between uses
- Built with weatherproof components, the sprayer is engineered to perform reliably in a variety of outdoor conditions, ensuring long-term durability
- The adjustable spray nozzle allows the operator to easily customize the spray pattern
